

## Dual hydroxy acids provide dermocosmetic acceleration of skin renewal.

- Target skin texture with a dermocosmetic, solution-specific formula.
- Features scientifically proven ingredients to improve skin smoothness.

Break through to your best skin with potent, patent-pending *Mary Kay Clinical Solutions*® boosters designed to complement your existing skin care routine.

**POWER STATEMENT:**

**Dual hydroxy acids provide dermocosmetic acceleration of skin renewal.**

Accelerate surface skin renewal and gently dissolve dead skin cells with a powerful boost of large and small hydroxy acids plus skin-replenishing glycerin for beautifully smooth, radiant skin.

**Poly-Hydroxy Acid (PHA)**

- Our amount of poly-hydroxy acid was specifically chosen so it can be left on skin. It helps improve skin radiance and the appearance of skin texture by breaking apart the bonds between dead skin cells to accelerate exfoliation on the top surface layer of skin.

**Alpha-Hydroxy Acid (AHA)**

- Alpha-hydroxy acid helps accelerate skin renewal and exfoliation by breaking apart the bonds between dead skin cells on multiple surface layers.
- This leave-on acid also helps improve skin radiance and the appearance of skin texture for overall smoothness.

**Glycerin**

- Glycerin is a widely used humectant due to its ability to attract water to itself and help boost moisture levels on the top layers of skin.

**Application Instructions**

Use 2 or 3 times per week in the evenings. After cleansing and toning, squeeze 6 to 8 drops (individual usage may vary depending on personal preference) into hands. You may find you need fewer drops, so you can adjust the usage amount to your individual needs. Evenly apply to your face and neck, avoiding the eye area. A slight sensation may be noticed. This product contains AHA which may increase your skin's sensitivity to the sun. Use a broad-spectrum SPF sunscreen and limit sun exposure while using this product. Can be layered with the HA + Ceramide Hydrator. Apply the resurfacer, then follow with the hydrator. **DO NOT USE** PHA + AHA Resurfacer with *Mary Kay Clinical Solutions*<sup>®</sup> Retinol 0.5, with *Clear Proof*<sup>®</sup> products containing salicylic acid or on the same day as other exfoliating products.

**Try This If:**

- You want to address skin texture.
- You want a dermocosmetic solution for skin smoothness.
- You want to use well-known and scientifically acclaimed ingredients.

**Formula Attributes:**

- Dermatologist-tested
- Tested for skin irritancy and allergy
- Non-comedogenic

**Use-Up Rate:**

Product lasts 4 to 5 months when used 2 or 3 times per week.
